Version 16/11/26

OUR LIFT AND RECLINE CHAIRS

THE WALLGLIDER

The Wallglider is perfect for small rooms as the chair moves away from the wall as it reclines. The leg rest can raise and lower independently of the backrest, allowing you to sit upright with your feet elevated.

THE BED CHAIR

The Bed Chair is the ultimate in flexibility as the leg rest and the backrest work independently by utilising their individual motors. The backrest reclines to a completely flat position, whilst the leg rest fully extends upwards and outwards for the perfect afternoon nap.

THE LUMBAR CHAIR

The Lumbar Chair is the ultimate lift and recline chair featuring four independent motors for maximum adjustability and comfort. The top motor adjusts the head and neck piece. Another motor independently reclines the back, another lifts the legs, and the fourth motor moves the lower back area of the chair, creating the perfect customised support for your lower back.

THE ZERO GRAVITY CHAIR

Our Zero Gravity chairs offer rare functions that are unique to other lift and recline chairs. Both chairs not only tilt back in a comfortable, relaxing position, they also have the ability to raise your legs beyond 90 degrees. When you tilt back in a Zero Gravity chair, the pressure you normally feel sitting upright shifts to different parts of the body.

WA CUSTOM MADE CHAIRS

Our WA custom made chairs are handcrafted to your measurements and requirements. You can customise the shape of the back, seat size, leg length and the colour of fabric. We also have a large range of material options including waterproof fabrics, leather and denim that will allow you to design a chair that suits your décor and your personality.

Made to your measurements right here in WA, so you can rest assured knowing that you have a high quality product that will last. That is why we offer a comprehensive 5 year warranty on all new custom-made lift and recline chairs. This includes the motor, frame and fabric.

CHAIR BACK STYLES

COMFORT 2-ROLL BACK

A two roll soft backrest, best suited at users that enjoy to recline in their chair. The WA-made option, offers zips for stuffing adjustment as well as an additional lumber support pocket with inserts.

CLASSIC BACK

A higher style back, with an adjustable, removable flip-cushion for additional neck support. This style back offers a firmer more supportive feel with a slightly contoured back to assist in posture control.

6 POINT GUIDE TO CHOOSING THE RIGHT CHAIR

SINGLE OR DUAL MOTORS?

Single motor chairs are easy to use as they feature just two buttons on the handset, “up” and “down”. All of our single motor chairs function by moving the backrest first, followed by the footrest which allows you to recline without fully lifting your legs. The two-button handset can be easier to use for those with poor cognitive ability, dementia or Alzheimer’s.

Lift and recline chairs that feature dual motors allow the backrest and the footrest to be adjusted independently of each other. This allows for a larger variety of customisable recline positions compared to single motor designs.

SIZE OF THE USER

The size of the user should be taken into consideration when choosing a chair. It is important to get the right-sized lift and recline chair to ensure proper ergonomics and correct posture is maintained.

Seat widths, depths and heights are all essential things to take into consideration before selecting a chair that is right for you. We also offer custom-made chairs, made individually to suit your needs.

SPACE

Space in your home is something to take into consideration when deciding on a recline chair. Standard recline chairs require clearance room between the chair and the wall so they can recline to their maximum. Some of our models have the space saver, or “wall glider” mechanism. These lift chairs may be positioned as close as 15cm from a wall dramatically reducing the amount of space needed in your home.

COMFORT LEVELS

Depending on personal preference, there are a number of different comfort options available with our lift and recline chairs. From the classic back to the two-roll comfort back, they offer different levels of back support, neck support and overall comfort.

COLOURS AND FABRICS

Our chairs are available in different colours and fabrics, including leather. Our large variety of colours means you should have no problem matching the chair to the colour scheme of your home. Please note that additional fees will apply for certain colours and fabrics.

BUDGET

We offer an extensive range of lift and recline chairs to suit all budgets. From standard single motor chairs to custom ordered, Australian-made, dual motor lift chairs.

High Leg Recline	✗
Independent Recline	✗
Recline + Leg Lift	✓
Recline + Straight Leg Lift	✓
Sleep Recline	✗

The Motobility Wallglider is the perfect chair for small rooms. As it goes through it's recline action the chair pivots and moves forwards away from the wall. This allows you to leave minimal space between the chair and the wall.

The recline action has been split into two distinct movements, where the leg rest can raise and lower without the backrest moving, allowing you to elevate your feet whilst sitting upright. We refer to this the reading position, although it is also great for enjoying a Cuppa with a biscuit or two.

The backrest can only recline once the legs have been fully elevated. Simply continue to push the button that raised your footrest and the backrest will start to recline. You can halt the motion at any time.

You may want to recline slightly for a more relaxing position to watch TV, or continue the recline up to 45 degrees for a comfortable afternoon nap.

Thanks to the easy to use 2-button remote, this chair is also suitable for users with limited cognitive functions, or people that love simplicity. The Wallglider is available in three frame sizes of small, medium and large, please refer to our measurement guide for sizing.

THE BED CHAIR

High Leg Recline	✗
Independent Recline	✓
Recline + Leg Lift	✓
Recline + Straight Leg Lift	✓
Sleep Recline	✓

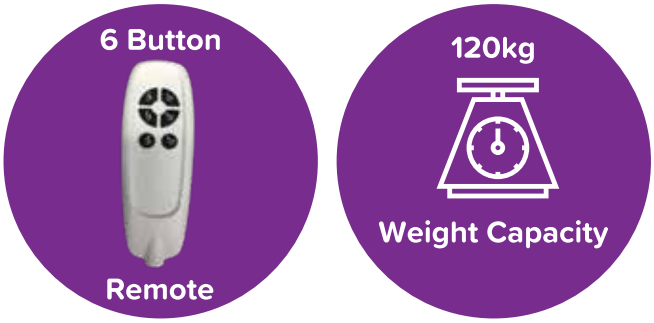
The Motobility Bed Chair is the perfect chair for those looking for ultimate flexibility in choosing a seating positions. The Bed Chair has two motors; one to control the movement of the leg rest and the other to control the movement of the backrest.

The backrest can be reclined to a fully horizontal position, while the leg rest can be fully extended, allowing you to effectively turn your chair into a horizontal surface, giving this chair it's name.

The ability to control the two movements separately provides an enormous range of flexibility when it comes to seating positions and leg lift angles. This function can be very useful for people who suffer from limited flexibility in their backs.

The movement of the chair allows the user to have a chair that they can truly sleep in. While we don't recommend this chair to be used as a bed replacement, it allows for longer more comfortable naps throughout the day.

Custom extra large bariatric options are available. They offer an increased weight capacity of 200kg and feature wider seat dimensions.



THE LUMBAR CHAIR

Adjustable headrest and lumbar support

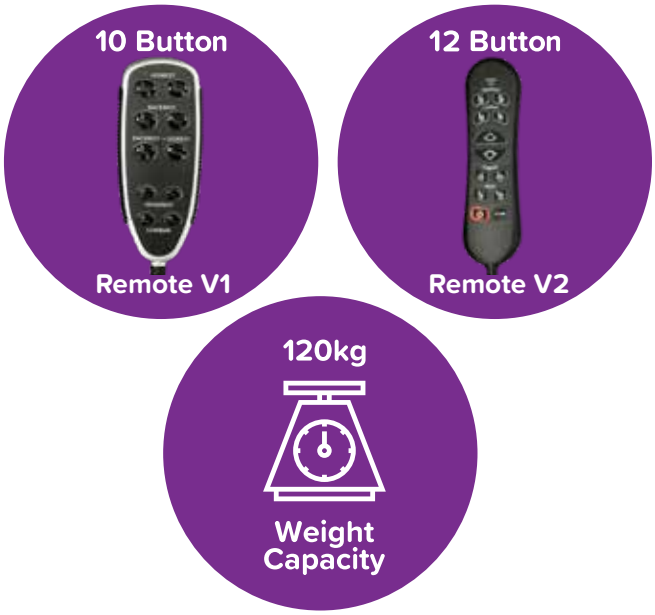
The **Lumbar Chair** is the ultimate lift and recline chair featuring four independent motors for maximum adjustability and comfort. The top motor adjusts the head and neck piece. Another motor independently reclines the back, another lifts the legs, and the fourth motor moves the lower back area of the chair, creating the perfect customised support for your lower back.

The chair also lifts you all on its own which is perfect for anyone who struggles with standing. You can also keep your new chair in its raised position, sit down and use the controller to gently slide yourself back down to a fully seated position easily and carefully without the need to have to lower yourself all the way down to the chairs seat on your own.

This chair is available in a medium and large size. They feature a durable, long wearing fabric, a side pocket and a light up controller.



THE CONFIGURA CHAIR

The **Configura Comfort Lift & Recline Chair** is a dual-motor lift and recline chair that is available in 4 different sizes (small, medium, large and bariatric). As the name suggests, this rise-and-recliner is designed to be easily configurable to suit a number of different needs.
Unlike other chairs, the Configura range of chairs comes with a number of different “accessories,” which, when fitted, fully transform the chair into a customised product.

The accessories can be changed and amended at any given time to suit a customer’s changing needs. Thanks to the corded handset and transfer aid compatible base, the design allows for easy operation.

Available in a small, medium and large sizes.

Our **Zero Gravity Chairs** offer rare functions that are unique to other lift and recline chairs. Both chairs not only tilt back in a comfortable, relaxing position, they also have the ability to raise your legs beyond 90 degrees. When you tilt back in a Zero Gravity chair, the pressure you normally feel sitting upright shifts to different parts of the body.

This offers pressure relief for your back, legs and other areas that become sore such as the calves or the coccyx (tailbone). Sitting in this position for small periods throughout the day, instead of constantly being in a fully horizontal or upright position can assist with preventing pressure sores and help minimise the pain or discomfort caused by sitting or lying down for long periods.

- Tilts and reclines back allowing legs to rise above the head.
- Raise legs higher than 90 degrees.
- Assist with relieving pressure on back, legs, tailbone.
- Can help prevent pressure sores and discomfort.
- Medium and large sizes available.

OTHER EQUIPMENT
AVAILABLE FROM MOTOBILITY

ELECTRIC WHEELCHAIRS

Manual Wheelchairs, Power Wheelchairs, Folding Electric Wheelchairs, Motorised Powerchairs and Portable Powerchairs can be a great alternative to mobility scooters. They provide the same options as scooters, but often offer additional comfort features, not to mention their fantastic turning circle. Lightweight motorised powerchairs & electric wheelchairs are transportable and sturdy, making them the preferred choice for any in-home and use on-the go.

OTHER EQUIPMENT
AVAILABLE FROM MOTOBILITY

MOBILITY SCOOTERS

Motobility offer an extensive range of travel scooters, portable scooters and large mobility scooters from the mobility industry's most reputable brands including Solax, Luggie, Supascoota, E-Traveller and more. Choose from lightweight automatic folding travel scooters, manual-folding scooters, large scooters and portable pull apart scooters.

OTHER EQUIPMENT
AVAILABLE FROM MOTOBILITY

ADJUSTABLE BEDS

Motobility's electrically adjustable beds are engineered to provide comfort and relief. Our extensive range of beds combines the look and feel of a stylish ensemble with all the health benefits and convenience of an adjustable bed.

STAIRLIFTS

A staircase should not stop anyone from continuing to live in their own home. Motobility is the local distributor of world-renowned Stannah Stairlifts in Australia; the safe, reliable and painless alternative to climbing the stairs. Stannah applies a simple design that provides easy operation from the seat mounted joystick or remote control. All stair lifts are fully installed and maintained by our trained technicians.

GOVERNMENT GRANTS

WHAT ARE GOVERNMENT GRANTS?

Over the past few years, there has been a big push by the government to promote “ageing in place”, which means trying to keep people in their own homes or in retirement communities, rather than moving to a nursing home. In order to achieve this, the government is offering support, including services and equipment grants. Depending on your circumstances, you may be eligible.

WHAT HELP CAN I RECEIVE?

With the introduction of the NDIS (National Disability Insurance Scheme), the sector has undergone the most significant reform since Medicare. While there have been mixed reviews, the NDIS promises a more longterm approach of assistance and education. It is important to note that you have to be 65 years or younger to be considered for the NDIS. If you are over 65 years of age, you may be eligible for one of the below.

Home Care Packages (HCP) through My Aged Care are a way that older Australian’s can access affordable services to get assistance around the home. These are designed to cater for more complex needs and can include allowances for Assistive Technology (AT) at higher levels.

Equipment For Living Grant (EFL) through the Independent Living Centre ILC) funded by the Department of Communities (formerly DSC) aims to assist people in obtaining vital equipment not currently available through other funding channels. These need to be essential items that will support the user in everyday tasks around their homes and the community.
